

ANNUAL REPORT TO CDNL 2011

Name of country: **Iceland**

Name of library: **National and University Library of Iceland - NULI**

Name of Chief Executive: **Ingibjörg Steinunn Sverrisdóttir**

Name of contact person for international matters: **Ingibjörg Steinunn Sverrisdóttir**

Mailing address: **Arngrímsgötu 3, 107 Reykjavík, Iceland**

Telephone: **+354 525 5600** Fax: **+354 563 5615**

Web address of the Library: **www.landsbokasafn.is**

Email address for contacting the library: **upplys@bok.hi.is**

1. General overview of recent major developments at the reporting library.

The Library is both the National Library and the library for the University of Iceland. It is a research library that shall maintain effective and comprehensive information services in the fields of science and scholarship, government, culture and economy. In accordance with the 2005 performance target agreement between NULI and the Ministry of Education, Science and Culture, the library's position as a knowledge provider has been underlined. With reference to the dual functions, emphasis has been placed mainly on *a digital national library* and *a digital research library*. The Library was established in 1994 with the union of the National Library of Iceland (founded in 1818) and of the Library of the University of Iceland (founded 1940).

2. Note of the reporting library's relationship to government, citation of legislation which sets out the library's mandate, and any other legislation which directly or indirectly affects the library's operations.

One of the main tasks in 2010 involved planning and adopting a new organizational chart. The new chart was approved by the governing board in December and came into effect 1st of January 2011. At the end of the year the Ministry of Education changed the regulation of the Library regarding organization of the institute.

The strategic policy was adopted in 2009 under the banner [*Access to Knowledge for Everyone : policy for the National and University Library of Iceland 2009 – 2012*](#). The main focus areas are: services to the Library's users, electronic solutions, the harvesting and preservation of digital materials and collaboration with other parties active in the same sphere. Also NULI must be a strong partner in the library and educational system of the country and in the preservation and dissemination of national culture and heritage.

3. Key facts and figures (size of major collections, number of staff, total operating budget, etc).

Holdings:	
– general collections – units	980.000
– manuscripts – units	15.100
– music and film collection – units	18.900
– web archive – documents	1.200.000.000
– digitized material – pages	3.600.000
Access:	
– national licences – journals	17.300
– national licences – databases	14
– NULI licences – journals	1.200
– NULI licences – databases	26

Staff (FTE)	76.5
Operating expenditure - in million ISK	657.959

4. New developments in creating and building collections.

Digitization

The digitization of Icelandic newspapers until year 2000 was completed. Digitization of various periodicals continued. About 1200 manuscripts have been digitized, a total of 300.000 pages and 120 titles of books, a total of 85.000 pages, were also digitized and are available on the Internet.

Web Archiving

NULI has harvested the Icelandic web domain .is and other Icelandic related websites since 2004. The web archive, vefsafn.is was opened in 2010. The web archive now contains about 1.2 billion documents and can be searched and browsed via url's and a timeline.

Repository and Open Access

The administration and development of an Open Access repository for theses and writings of university faculty is the responsibility of the library. It now contains 7000 units. Another repository was set up 2009 for the purpose of collecting Icelandic legal deposit materials that are born digital, such as newspapers, e-journals, reports etc. The material is collected by library staff, but also received in pdf format. The repository has not been opened to the public.

5. New developments in managing collections.

Websites and access portals to digital collections have been improved and usage statistics are monitored closely. The number of active users of the Library's web is constantly growing. Version 20 of Aleph500 will be installed in 2011 for the National Union Catalogue, Gegnir. SFX Classic link server was installed 2010 to give better access to electronic resources of The Icelandic Consortium for Electronic Subscriptions (ICES), hvar.is, and electronic subscriptions of universities.

6. New developments in providing access to collections.

NULI was partner in the European Enrich project for digitizing and cataloguing manuscripts and a new portal for manuscripts was opened in 2010. The Consortium of Icelandic Libraries, that operates the Gegnir, the Icelandic library system is installing an integrated search machine, Primo, for Icelandic bibliographic records and digital content. NULI is a partner of the project.

7. Examples of collaboration between the reporting library and other national collecting institutions (libraries, archives and museums).

NULI is an active partner in the Icelandic library system, Gegnir (Aleph from ExLibris). Gegnir hosts the national union catalogue and national bibliography and gives access to information about material in most libraries in the country.

NULI runs The Icelandic Consortium for Electronic Subscriptions (ICES), hvar.is. The licences are paid by institutions and majority of libraries in the country. The economic crisis in 2008 was a major blow for the project and a lot of effort has been put in to save it. New 3year contracts were signed in December 2010.

NULI is partner of Nordbib (Nordic Open Access program) the European projects TEL, TELPlus, Europeana and Enrich and web archiving projects run by IIPC.

NULI is a partner of IFLA, CDNL, CENL and LIBER.
